Pramodika Dulanja

Full Stack Developer Intern

Balangoda, Sri Lanka +94 71 286 6339 dulanjapramodika@gmail.com
Pramodika Dulanja PramodikaDulanja Portfolio

SUMMARY

Results-driven Computing and Information Systems undergraduate passionate about full-stack development and building user-centered web applications. Skilled in developing responsive front-end interfaces and efficient back-end solutions through real-world projects. Strong in problem-solving, teamwork, and communication, with a commitment to continuous learning, exploring modern technologies, and growing as a professional full-stack developer.

EDUCATION

BSc. (Hons) in Computing and Information Systems 2024 – Present
Sabaragamuwa University of Sri Lanka

G.C.E Advanced Level Examination – Physical Science Stream 2022
Ananda Maithreya Central College Balangoda

SKILLS

Technical Skills

- **Programming Languages:** JavaScript, Java, Python, C, PHP
- **Frameworks:** ReactJS, Next.js, Node.js
- **Web Technologies:** HTML, CSS, Bootstrap
- **Database Management:** MySQL, PostgreSQL, Supabase
- **Design Tools:** Figma
- **Version Control:** Git, GitHub
- **DevOps & Cloud:** AWS, Docker Compose, GitHub Actions
- **Operating Systems:** Linux, Windows

Soft Skills

- Teamwork
- Leadership
- Problem Solving
- Clear Communication
- Critical Thinking
- Adaptability
- Time Management

PROJECTS

Illamu.lk – Rental Marketplace Platform | Individual Project

Next.js, TypeScript, Prisma (ORM), Supabase (PostgreSQL), NextAuth.js, Tailwind CSS, Vercel

- Developed a comprehensive peer-to-peer and business rental marketplace platform enabling users to list items, browse categories, filter by locations, and securely manage rentals.
- Implemented robust user authentication, server-side database integrations with PostgreSQL via Prisma, and environment configurations for seamless deployment on Vercel.
- Integrated cloud databases and connection pooling for reliable APIs and scalable marketplace performance.

GitHub Repository Live Demo

VolleyReel – AI-Assisted Volleyball Highlight & Analytics Platform | Group Project

React.js, Python, FastAPI, PostgreSQL, SQLAlchemy (ORM), FFmpeg, Librosa

- Developed a comprehensive sports analytics platform enabling volleyball coaches and tournament organizers to manage teams, upload match videos, and automatically generate highlight reels and performance analytics.
- Implemented a lightweight, human-in-the-loop event segmentation engine utilizing FFmpeg, OpenAI Whisper, and Librosa for audio signal processing to efficiently detect referee whistles and match keywords.
- Integrated asynchronous background task execution, secure RESTful APIs via FastAPI, and strict relational database management with SQLAlchemy to ensure highly reliable, non-blocking video rendering on standard hardware.

GitHub Repository

World Item Scanner – Global Visual Intelligence Sourcing Hub & Analytics Platform | Individual Project | Ongoing

Next.js, Tailwind CSS, Python (FastAPI), Pydantic, PostgreSQL, Multimodal AI, Reverse Image Search APIs

- Developed a cross-border visual search platform enabling users to upload item photos for automated object recognition, historical timelines, material breakdowns, and global e-commerce price comparisons.
- Engineered an asynchronous Python FastAPI backend integrated with multimodal AI vision models and web-scraping pipelines for real-time market data retrieval.
- Developed a responsive Next.js and Tailwind CSS interface with drag-and-drop uploads and dynamic pricing tables.

GitHub Repository

LeadGeo Pro – B2B Geographical Lead Generation & AI Enrichment Platform | Individual Project | Ongoing

Next.js, Tailwind CSS, Python (FastAPI), OpenStreetMap API, SerpApi, Leaflet.js, jsPDF, SheetJS

- Developed a targeted B2B lead generation platform enabling users to extract business data via interactive radius and regional mapping, with automated client-ready reporting to PDF and Excel.
- Implemented a Python FastAPI backend featuring a custom geocoding proxy to manage rate limits, integrated with SerpApi for an automated enrichment engine that extracts official company websites and LinkedIn profiles.
- Designed a modern Next.js frontend with Tailwind CSS, featuring dynamic skeleton loading states, interactive map visualization, and a smart one-click WhatsApp outreach pipeline with automated mobile number validation.

GitHub Repository

Delish Food Restaurant – Static Website

HTML, CSS, JavaScript, GitHub Pages, Vercel

- Developed a responsive restaurant website with an attractive and user-friendly interface for browsing food items and restaurant information.
- Implemented interactive features using JavaScript to enhance user engagement and overall browsing experience.
- Deployed the website on Vercel, ensuring reliable and accessible web hosting.

GitHub Repository Live Demo

CERTIFICATES

- **Web Design for Beginners:** University of Moratuwa *Certificate*
- **Innovate With Ballerina:** IEEE Student Branch University of Moratuwa and WSO2 *Certificate*
- **Advanced Java Programming:** Sabaragamuwa University of Sri Lanka
- **Introduction to Artificial Intelligence:** Simplilearn *Certificate*
- **Introduction to DevOps Tools:** Simplilearn *Certificate*
- **AWS Essential Training for Developerss:** LinkdIn Learning *Certificate*
